## Experience

**Founder, *Kannah Consulting and Software Services*** August 2015 - Present

Providing consulting services to businesses & Individuals

**Founder, *MeetingHero.ai*** November 2024 - November 2025

- Designed and built AI-powered SaaS platform integrating Google & Microsoft APIs for meeting preparation and intelligence
- Architected scalable cloud infrastructure on AWS ensuring high availability and performance
- Implemented secure authentication, calendar integrations, and automated workflows
- Deployed AI-powered data pipeline for delivering actionable insights and improving decision-making

**Chief Technology Officer, *Course Key, Inc.*** August 2014 - September 2024

Joined CourseKey as a technical co-founder. Helped take it from conception to acquisition.

- Led and scaled the engineering team from 2 students to 30 professional engineers, fostering a culture of innovation and collaboration (in person and remotely)
- Designed and deployed a scalable, multi-tenant SaaS architecture on AWS, supporting 50K+ concurrent users with 99.9% uptime
- Designed CI/CD pipelines and DevOps practices (Jenkins/GitHub Actions)
- Oversaw data architecture handling millions of student attendance records
- Patented algorithms for verifying participation in a meeting location via sound and geo location
- Built complex user attendance and hours tracking system

**Independent Developer and Consultant, *Freelance*** March 2014 – May 2015

Started my own software development business where I work on personal projects and provide my services to other businesses.

- **Warframe Farmer Assistant, *Kannah Software Services*** July 2014 – September 2014
- **Database Architecture Consultant, *S&T Auto Repair*** June 2014 – July 2014
- **Web Development Consultant, *SDSU MESA Engineering Program*** June 2014 – July 2014

## Key Strengths

**Architecture & Strategy:** Expert in designing scalable, secure, and resilient distributed systems, balancing performance, cost, and reliability.

**Technical Leadership:** Proven ability to lead engineering teams, mentor developers, and drive system-wide architecture decisions in person and remotely.

**Innovation & Execution:** Track record of delivering patented solutions, shipping complex SaaS products, and integrating cutting-edge technologies.

**Process & Delivery:** Skilled in Agile development, CI/CD, and data-driven decision-making to ensure efficient execution and continuous improvement.

## Technical Skills

**Architecture & Cloud:** AWS/GCP/Azure, Microservices, Multi-tenant SaaS, Serverless, Event-Driven

**DevOps & Delivery:** CI/CD, Docker, Infrastructure as Code, Testing, Monitoring, Agile/Scrum

**AI & Machine Learning:** OpenAI APIs, Agentic AI, Vector Stores, Custom ML Models, AI Integration

**Security & Compliance:** SOC 2, OAuth 2, OpenID Connect, SAML, Security Scanning, Access Control

**Languages & Frameworks:** Node.js, TypeScript, Python, SQL/NoSQL, Redis, GraphQL, REST APIs, React, Next.js, Vue3, Svelte, Responsive Design

## Education

**B.S. in Computer Engineering, *San Diego State University***

May 2019
