Experience

Founder, *MeetingHero.ai*   November 2024 - Present
· Designed and built AI-powered SaaS platform integrating Google & Microsoft APIs for meeting
  preparation and intelligence
· Architected scalable cloud infrastructure on AWS
· Implemented secure authentication, calendar integrations, and automated workflows
· Deployed AI-powered data pipeline for delivering insights

Founder, *Kannah Consulting and Software Services*   August 2015 - Present
Providing consulting services to businesses & Individuals

Chief Technology Officer, *Course Key, Inc.*   August 2014 - September 2025

Joined CourseKey as a technical co-founder. Helped take it from conception to acquisition.

· Led and scaled the engineering team from 2 students to 30 professional engineers
· Architected, built and maintained the infrastructure running CourseKey's systems
· Designed CI/CD pipelines and DevOps practices (Jenkins/GitHub Actions)
· Oversaw data architecture handling millions of student attendance records
· Patented algorithms for verifying participation in a meeting location via sound and geo location
· Built complex user attendance and hours tracking system

Independent Developer and Consultant, *Freelance*   March 2014 – May 2015

Started my own software development business where I work on personal projects and provide my
services to other businesses.

· **Warframe Farmer Assistant,** *Kannah Software Services*   July 2014 – September 2014
· **Database Architecture Consultant**, *S&T Auto Repair*   June 2014 – July 2014
· **Web Development Consultant**, *SDSU MESA Engineering Program*   June 2014 – July 2014

Key Strengths

Architecture & Strategy: Expert in designing scalable, secure, and resilient distributed systems,
balancing performance, cost, and reliability.
Technical Leadership: Proven ability to lead engineering teams, mentor developers, and drive system-
wide architecture decisions in person and remotely.
Innovation & Execution: Track record of delivering patented solutions, shipping complex SaaS products,
and integrating cutting-edge technologies.
Process & Delivery: Skilled in Agile development, CI/CD, and data-driven decision-making to ensure
efficient execution and continuous improvement.

Technical Skills

Languages: Node.js, TypeScript, Python
Cloud Platforms: AWS, Azure, GCP
DevOps / Infra: Docker, Terraform, CI/CD
Data & Architecture: Microservices, Multi-tenant SaaS, Event-driven architecture, Databases
(SQL/NoSQL)
Security & Compliance: OAuth2, OpenID Connect, SAML, Identity management, SOC, FERPA

Education

B.S. in Computer Engineering, *San Diego State University*   May 2019
